PAUL RYAN
EFPA SQC MEMBER

The Corona Virus can be considered a 'black swan' event in the same way as the Global Financial Crisis of 2008 was. Is the impact of both these crises similar or are there distinct differences that will potentially affect investor's asset allocation decisions?

How will the effect of the Corona Virus impact on allocation decisions both within and across asset classes?

The face of retirement has changed radically in recent decades: people are living longer; pensions are increasingly rare.

It's no wonder many people feel anxious about funding their retirement.

Is there a way to create a plan that can give you a regular "retirement paycheck"?
